EXPERIENCE

WEB DEVELOPER | APRIL – JULY 2020

DevMountain

> Worked in a remote environment to build full-stack applications both individually and as a member of a team.

> ECHO:

- A web app for users to create an account, create their own "Chamber", create posts with three different media types (data storage in Amazon S3), and interact with other users.
- Built with React, Sass, Material UI, Node, Express, Amazon S3, Redux, Axios, and PostgresQL.

> STEMS:

- A web app for users to upload and share music samples and organize them into libraries, full authentication.
- Built with React, Sass, Node, Express, Axios, Amazon S3, PostgresQL and more.
- Selected as Most Technical by DevMountain staff for unique implementation of Amazon S3.

AUDIO ENGINEER | JAN – APRIL 2020

Groove (Contract)

> Supervised utilization and set up of audio equipment and technologies for large scale live events.

> Efficiently routed complex cable systems in various performance venues.

CONTENT PRODUCER/COMPOSER | JULY 2018 – JAN 2020

The Practice (contract)

> Partnered with high-profile brands, such as Samsung, Spotify and L'Oreal to bring audio content to their marketing campaigns.

> Utilized Ableton Live and other technologies to deliver custom tracks and sound design.
